QUALITY SYSTEM

We have earned a reputation for the best customer service, and we will continue to deliver on that expectation. We pride ourselves on our quick responses to quote requests and on-time delivery. Our Advanced Product Quality Planning assures products meet customer requirements. We are dedicated to continually improving our services.

- Certified with AWS welding codes and procedures
- Certified for the American Bureau of Shipping (ABS)
- Non-destructive testing available

We have also completed the successful implementation and registration of our ISO9001/2015 Quality System.

MATERIAL HANDLING

We have a multi-hook overhead crane system with a 25-ton lift capacity that spans 72' x 320' of our manufacturing floor space with easy transport access, allowing us to handle large projects. We also have a 10-ton vacuum lift, which allows us to handle the metal without causing scratches.

CAD DEPARTMENT

Bay Metal Works Inc. has a fully integrated CAD Department that can help you through the design and programming of your project. We accept the following file formats:

- AutoCAD DXF or DWG any version
- Solidworks any version
- STEP Files
- IGES
- Pro E
- Solid Edge
- CADKEY

Sketches are also welcome!
